Symposium

This symposium aims to consolidate the networks of the Humanitarian Architecture Research Bureau (HARB) non-profit, humanitarian agencies. It will draw on existing links and also seek to build new links particularly with organisations that implement shelter programs after natural disasters such as the recent earthquakes in Nepal and typhoons in the Philippines. The first part of the symposium will introduce the work of HARB and its partners, leading to a discussion on strengthening and building partnerships. How HARB might be able to play a role and support current and future initiatives in post-disaster shelter in recent disaster sites will be explored.

Panel Discussion: Role of Design in Post-Disaster Shelter

- **Esther Charlesworth**, HARB, RMIT
- **Alison Cleary**, Australian Institute of Architects
- **Peter Lawther**, Australian Red Cross
- **Brett Moore**, World Vision International
- **Suresh Pokharel**, Plan International
- **Paul Pholeros**, Health Habitat
